

PROFILE

I live in the City of Buenos Aires, born on september 18 ,in 1986, I am currently in the Jobs search in the systems sector. I am currently and in testing them, My focus is dedicated to the parts of unit testing. Why am I applying for systems, adn even more so for the testing área? Because I am aware that in this sector, thinking outside the box is required and havint a technical profile with experience in other áreas allows me to bring a diferentes prespective when conducting tests.
